Botron B09622 Technical Data Sheet

Overview:

Botrons PCB probe is a multi probe with a forming tip at one end used when soldering and at the other end a hooking tip for holding wires.

		2
PROPERTIES	SPECIFICATIONS	3
		21

Surface Resistivity: 10³-10⁸

Material: Conductive plastic

Fibers: Synthetic (low or no static generation)

Size: 6

Product Notes and Features

- Remove unwanted dirt and clipping from PCB's
- Minimize static charge generation when held by grounded personnel
- Ergonomic Design
- Many sizes for any jobs
