

Description

CleanPro® disposable lab coats are individually inspected for stitching, sizing, material, and workmanship. Lightweight for breathability and comfort, these are also designed for roominess and full coverage (knee length).

These coats are made with non-linting, non-woven 100% spun-bond polypropylene and coated with polyethylene to seal the surface, as well as provide protection from fluids.

Lot quality controlled and traceable, these lab coats come with 5 snap closures, 3 pockets, and elastic cuffs.

Specifications
